PROJECT

CAMPUS MARKET PLACE (DE Project)

- Designed and developed a Campus Marketplace platform to enable students to buy, sell, and exchange items securely within a college environment.
- Implemented user-friendly features focused on student needs, ensuring safe transactions and ease of use. Enhanced resource sharing and reuse by creating an efficient digital ecosystem for campus communities.
- Demonstrated skills in problem analysis, system design, and digital platform development tailored to real-world student use cases

VISUAL STUDY GROUP (DE PROJECT)

- Developed an interactive Collaborative Whiteboard to enable real-time visual communication, brainstorming, and problem solving among students.
- Enhanced team collaboration and engagement within a Virtual Study Group Platform by supporting shared idea expression in a single synchronized workspace.
